

# TABLETS & CAPSULES

www.tabletsandcapsules.com

May 2017

Volume 15 Number 4

In this issue, packaging consultant Edward Bauer explores the possibility that new leadership at federal agencies will lead to better pharmaceutical packaging. Kerry Johanson explains how to assess your powder blend and your feed system for segregation and offers ideas for improvement. Changquan Calvin Sun spells out how recent research will help formulators develop better tablets. Claudia Silva and her colleagues describe how they developed a dissolution test for oil-filled softgels. William McCarthy describes the bright future of mesoporous silica in delivering challenging APIs.

## packaging

**How the new political climate could affect pharmaceutical packaging**
