

# TABLETS & CAPSULES

www.tabletsandcapsules.com

October 2017

Volume 15 Number 7

Cover photo shows Model 2500 Select dissolution instrument, which includes bathless heater jacket and Opt-Diss UV fiber optic Arch probe positioned in standard dissolution vessel. Bathless heating eliminates water bath and associated maintenance and raises temperature from ambient to 37°C in less than 15 minutes. Arch probe measures directly in the vessel, eliminating need for manual or automated sampling. Courtesy of Distek, North Brunswick, NJ. Tel 732.422.7585. Website: www.distekinc.com.

## quality, validation, & regulatory compliance

- Using fundamental powder properties to optimize flowability** 11  
*Greg Mehos, Mike Eggleston, Tristan Trautman, Matthew Freeman, and Nicole Stevens-Murphy*
- Using low-content active ingredients as an indicator of overall blend and tablet uniformities** 21  
*Wenming Zeng, Dan Wang, and Doug Roper*
- A look into the world of cannabinoid formulation** 26  
*David Schaible*
- Issue focus: Quality, validation, and regulatory compliance** 31

## tablet & capsule identification

- The evolution of on-dose product identification** 33  
*Edward S. Novit*
- Tablet and capsule identification: A survey of what's available** 38

## also in this issue
