

# Interphex

## a preview

### *Pharmaceutical expo debuts CMO/CDMO, material supplier exhibition areas*

The annual Interphex trade show and exhibition returns to New York City's Javits Center, April 17-19. More than 11,500 industry professionals attended last year's conference, and organizers are expecting attendance to increase this year. The show floor will host 625 companies that will exhibit their equipment, products, and services.

The 3-day conference will offer attendees the opportunity to join more than 50 technical sessions. These educational sessions kick off on Tuesday, April 17, at 10:15 am with the Interphex Live presentation "Advantages of Continuous Manufacturing for Solid Dosages," by Robin Meier, manager of scientific operations at LB Bohle, Warminster, PA, a supplier of pharmaceutical process machines. Other sessions will explore continuous manufacturing, quality metrics and systems; formulation and stability; manufacturing efficiencies and improvements; optimizing facilities through innovation and technologies; risk management; and contract manufacturing. A complete list of educational sessions can be found at <http://bit.ly/InterphexEducation>.

This year's show features a dedicated section on the show floor for North American contract development and manufacturing organizations sponsored by Pharma & Bio Outsourcing Association (PBOA). In addition to PBOA-hosted networking events, which allow attendees and suppliers to connect, the area will feature a conference program focused on realizing cost efficiencies and acceler-

ating process and technology advancements.

Another new area at Interphex 2018 is Formulation X, which features suppliers of APIs, raw materials, excipients, and fine chemicals. This area offers more than 14 technical sessions on formulation, stability, and quality.

The following companies and organizations are among those exhibiting at Interphex this year. For a complete, updated list, visit [www.interphex.com](http://www.interphex.com).

Company	Booth	Company	Booth
AAF Flanders	4152	Ropack Pharma Solutions	1140

#### What?

Interphex

#### Who?

Professionals involved in the specification, recommendation, or purchase of technologies, products, and services for the development and manufacture of pharmaceutical products

#### Where?

Javits Center, New York, NY

#### When?

##### *Exhibition*

April 17-18 10:00 am to 5:00 pm

April 19 10:00 am to 3:00 pm

##### *Technical conference*

April 17-18 10:30 am to 5:00 pm

April 19 10:30 am to 12:15 pm

#### For more information
