

TABLETS & CAPSULES

www.tabletsandcapsules.com

October 2018

Volume 16 Number 7

With stricter regulations, both in the US and abroad, and increasing threats to the supply chain, quality, validation, and regulatory compliance have never been more important. This issue of *Tablets & Capsules* includes a roundup of products that test for quality as well as articles exploring topics such as FDA mutual recognition agreements, using DNA molecular taggants to improve patient safety, and excipient quality standards. This issue also includes articles on the benefits of blister packs, the practical implementation of UV laser marking on solid dosage forms, and loss-in-weight feeder performance.

quality, validation, & regulatory compliance

Mutual recognition agreements and other FDA activities for monitoring the US drug product supply chain	12
	<i>James Evans</i>
Issue focus: Quality, validation, and regulatory compliance	16
Back page	48
