## a preview

### *Pharma expo debuts co-located automation/ data exchange manufacturing show*

Interphex, an annual pharmaceutical trade show and exhibition, returns to New York City's Javits Center, April 2-4. The trade show is expected to attract more than 12,000 global industry professionals and 625 exhibitors and offers demonstrations, partnering opportunities, networking, and a technical conference.

This year's conference will focus on human interface in the science of the pharmaceutical and biopharmaceutical supply chains. Session tracks include:

- Integrating human interface into smart manufacturing
- Ensuring alignment of facility suitability with formulation capability and stability across the supply chain
- Strategies for flexible manufacturing efficiencies and improvements
- Optimizing facilities through innovation and technologies
- Managing the interface with risk management and quality systems
- Leveraging partnerships with CMO/CDMO capability to advance process innovation
- Biotechnology and the acceleration to market

Interphex will be co-located with Innophex, a new trade show focused on cell processing, gene therapy, and the current trend of automation and data exchange in manufacturing technologies (Pharma 4.0). Innophex will feature dedicated exhibits, a technical conference, and networking opportu-

nities on various topics including robotics, 3D printing, augmented and virtual reality, the internet of things (IoT), and information management and data integrity.
