Interphex

a preview

Pharma expo debuts co-located fine and specialty chemicals show

Interphex, an annual trade show focused on pharmaceutical, biotechnology, and medical device development and manufacturing, returns to New York City’s Javits Center, April 28-30. Every year, more than 10,500 industry professionals and 620 suppliers from around the world attend the technical conference, exhibits, demonstrations, partnering opportunities, and networking events.

The conference will focus on new drug entities and how companies can break down barriers and facilitate rapid market entry. The 3-day educational program will include the following session tracks:

- Development and formulation
- Compliance and quality
- Processing and manufacturing
- Inspection and distribution
- Data and information management
- Automation and process controls

Educational session details are still to come. Check www.interphex.com in the coming months to see the technical conference schedule and session topics.

Chemspec, a trade show dedicated to fine and specialty chemicals, will launch in the US this year as a co-located event with Interphex. The technical content of the show will focus on substances or chemicals to enhance current drug products or develop new chemical entities.

Another co-located show, Innophex, will return to Javits Center this year. Innophex made its debut at the 2019 Interphex show and focuses on cell processing, gene therapy, and the current trend of automation and data exchange in manufacturing technologies (Pharma 4.0).

Partial Exhibitors List

The following companies and organizations are among those exhibiting at Interphex this year. For a complete, updated list, visit www.interphex.com.
